Preparing the Model for Assembly

Before assembling the model, wash each part thoroughly with an abrasive brush, such as a toothbrush, to remove any model release agent that may still be on the surface of the parts. Then, remove any excess resin such as mould lines, casting gates, vents and slims.

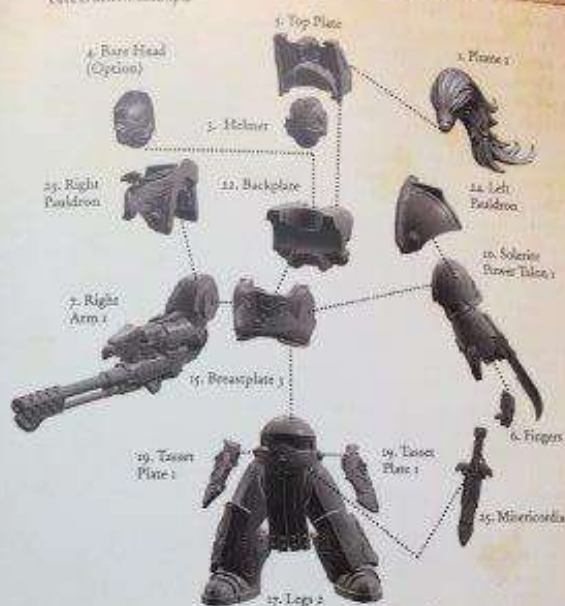

For a more detailed guide to working with resin models, go to the Downloads section of the Forge World website.

This kit contains all the pieces required to construct a squad of three Legio Custodes Aquiles Terminators with Infernus Firepikes. To glue the resin pieces together, use Citadel Super Glue.

NOTE: We have cast this kit using advanced techniques and the best quality resin, but due to the nature of the casting process, your model may contain small air bubbles. These can be filled with model filler or super glue. Any slight warpage of this parts can easily be corrected by immersing the part in hot tap water for about 1 minute, then carefully bending it back into shape.

If you need to contact the Forge World Customer Service team regarding this model, you can get in touch via email - forgeworld@ppl.com - or call: 015 503 4999 within the UK, 011 44 15 503 4999 from the USA and Canada, 011 44 15 503 4999 from Australia, 00 44 15 503 4999 from Europe and the rest of the world.
